ABOUT US

In this current diverse and dynamic Government Business environment, successful partnerships demand business organizations offering a rich, meaningful corporate culture with driven, determined leadership and skilled, motivated employees. This is **BiC-1, LLC**. Founded in a climate of honest, open, and successful engagements, we emphasize a talent-based personnel acquisition and management system, essential quality of life benefits, and building cohesive teams that are professional, and integrated for client mission success. **BiC-1, LLC** acquires, develops, employs, and retains the skilled technical talent required to assure Department of Defense and Civilian Agency success and total readiness in their mission critical programs. With our technical experience, program success and breadth of leadership, we are proud to provide ***best-in-class*** services to our many clients within the Federal Government space.

MISSION

BiC-1, LLC's mission is to provide transparent and fluid information technology support services that enable client and Agency mission success. We deliver secure, reliable, and effective technology solutions needed to fulfill the specific mission requirements, anytime … anywhere.

CORE COMPETENCIES

Amongst our many capabilities, BiC-1, LLC offers three specific core areas of competency:

- ✓ Cyber Security & Secure Information Systems
  - *Securing highly sensitive and mission-critical national security networks*
- ✓ Software Development, Systems & Services
  - *Solving complex problems in mission-critical environments*
- ✓ Intelligence & Analytics
  - *Gathering and analyzing data from multiple sources to provide high-quality, actionable intelligence across multiple contexts.*

KEY SUCCESS INDICATORS

- ✓ Serving Customers at 36 Locations | CONUS and OCONUS
- ✓ Employing more than 450 Highly Skilled Employees Worldwide
- ✓ More than $220M in Combined Revenue
- ✓ Board of Advisors Provide Compliance Oversight
- ✓ Experienced, Cleared Cadre of Personnel – Day 1!

WHY CHOOSE BiC-1, LLC

BiC-1, LLC is a leading provider of mission-critical technology, cyber, and data solutions to more than 50 US Federal Agencies. Applying decades of experience, our experts work to ensure the security of the digital domain, the effectiveness of complex IT systems, and the delivery of quality intelligence to key decision-makers.

SERVICES OFFERED

Cyber Security & Secure Information Systems

- Information Security & Event Management
- Network Intrusion Detection & Network Protection
- Identity Management & Access Control
- Security Risk Assessment

Software Development, Systems & Services

- Agile Software Development
- Command & Control Systems Development
- Complex Application Development
- Decision Support Systems Integration

Intelligence & Analytics

- Advanced Collection & Analysis Tools
- Multi-INT Exploitation & Dissemination
- Intelligence Analysis Training
- Multi-Lingual Intelligence Analysis

Civilian Agencies

GSA

Established in 2003, Veteran Engineering and Technology, LLC (VET) is a cVe registered SDVOSB providing Information Technology Systems, Systems Engineering, and Technical Management support in the development and sustainment of high-end, cost effective technical support services for a broad range of Government and commercial clients.

Core Competencies

Information Technology Systems

- Network and Systems Administration
- Website and Application Design
- Information Security/Assurance
- Cyber Security
- Helpdesk Support
- System and Application Test and Evaluation
- Network Monitoring and Analysis
- Remedy Trouble Ticket System
- VTC and Mobile Device Support
- SharePoint Development
- Microsoft Azure Cloud-Based Development
- Mobile Application Development

Systems Engineering

- Database Engineering and Maintenance
- Enterprise Architecture Design, Development, and Maintenance
- System Design and Development

Technical Management

- Program and Project Management
- Configuration Management
- Quality Assurance
- Lifecycle Management
- Technical Research and Analysis

Company Certifications

CMMI-DEV Maturity Level 3
ISO 9001:2015

NASA SEWP V: NNG15SD41B
ITES-3S: Sub to ACET - W52P1J-18-D-A083

Current and Past Performance

U.S. Army – Provide software maintenance, development, and enhancement to the Regional Level Application Software (RLAS) application. Operate and maintain the SharePoint platform and modules for the Army Reserve Portal Tool (ARPT). Sustain the interactive Personnel Electronic Records Management System (*i*PERMS) website and database. Provide software development and sustainment for the Army Training Management System (ATMS). Provide C4/IM sustainment for the Fort Dix Network Enterprise Center (NEC).

U.S. Air Force – Software development and sustainment of the Working Dog Management System (WDMS). SharePoint development and maintenance for the Air Force Security Forces Center (AFSFC). Developed and sustained the Air Force Technical Training Management System (TTMS) and enterprise Basic Military Training (eBMT).

U.S. Navy – Help desk support for the Navy History & Heritage Command. Public affairs support for Great Lakes Naval Station.

NASA – Oracle database administration for Stennis Space Center.

USDA – Web-based data management for the Animal and Plant Health Inspection Service (APHIS).

VA – Designed and implemented a specialized Search Engine in support of Veterans Health Administration (VHA) Innovation Program.

Colleges and Universities — Identity provisioning, password management, and ID synchronization.

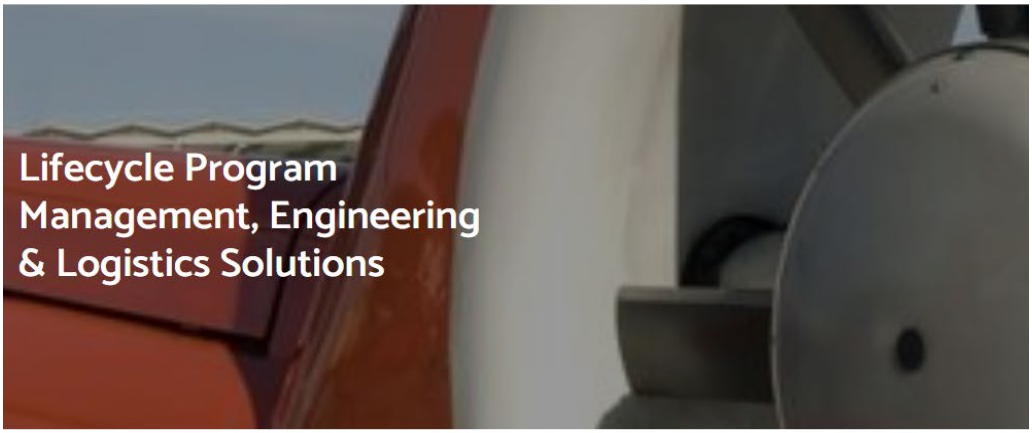
Command Decision Systems & Solutions



Lifecycle Program Management, Engineering & Logistics Solutions

CDS² Program Management, Engineering and Logistics services provide our clients with streamlined, effective solutions to the complex intricacies typically associated with this work. By taking a mission-centered approach, we ensure that our work has the end goal in mind, whether that be C4ISR System Integration, technical analysis of aircraft performance, or Engineering System Development, Test and Deployment.

Highlighted services we provide include:

Lifecycle Program Management

- Lifecycle Acquisition & Program Management
- DOD 5000 and JCIDS vulnerability assessments
- Critical Infrastructure Protection (CIP)/ Vulnerability Assessments and Solutions

Engineering

- Lifecycle Design, Development, Prototyping, Systems Integration, Production, Test & Deployment
- Engineering Studies & Analysis
- 3D Modeling, Simulation, and Rapid Prototyping
- C4ISR Platform Integration

Logistics

- Integrated Logistics Solution Optimization
- Reliability Centered Maintenance Conditioned Based Maintenance Studies & Analysis
- Infrastructure, Platform and System Service Life Extension
- Configuration Management
- Training & Technical Assistance
- TEMPEST and COMSEC Engineering, Maintenance and Inspection
- Technical Publications

CONTACTS

- **Dr. Kenn Lang**
  CEO
  klang@yorkandwhiting.com
- **Elsa Lively**
  Director of Defense and Intelligence Programs
  elively@yorkandwhiting.com

Y&W delivers technology-focused solutions across a wide spectrum of offerings enabling mission critical success in support of numerous federal and commercial clients. Our Subject Matter Experts (SME) have strong past performance in the areas of computer modeling and simulation, network design, IT architecture support, and applied analytics that rapidly drive and deliver data-centric transformation and modernization efforts, reducing risks and mitigating threats that advance workforce efficiencies and warfighter improvements, by identifying and assessing emerging, innovative concepts with Artificial Intelligence (AI), Machine Learning (ML), and Virtual Reality (VR).

KEY OFFERINGS

Systems Integration, Design and Engineering Support

- With our strong IT engineering background, we produce DODAF-compliant architecture views and artifacts, including Operational Views, system-to-system maps, data flow diagrams, and service composition diagrams that inform and influence “to be” systems and design architectures.

Digital Transformation and Cloud Services

- We help our customers better leverage cloud solutions, providing applications and service migration support, application development and cloud implementation services, and cybersecurity and encryption support.

Artificial Intelligence & Intelligence Operations

- We provide a range of AI and multiple-intelligence full-spectrum operations, restructuring processes and resources for enhanced discovery and retrieval by intelligence operators, analysts, and tradecraft SMEs.

Data Science and Analytics

- We support descriptive and predictive data analytics support that enable data at speed and scale, driving customer transformation and modernization initiatives that informs decision-making across the enterprise.

End2End Analytics Approach

Y&W offers our customers a highly successful, field-tested End-to-End (E2E) approach towards leveraging new concepts and technologies that effectively addresses all aspects of data centric warfare, data transformation, system modernization, AI/ML, intelligence operations, and advanced "to the edge" technology demonstrations. Our E2E fielded approach has successfully supported the Joint Staff, the Office of the Undersecretary of Defense for Intelligence & Security, the National Geospatial Intelligence Agency, the National Security Agency, and the Intelligence Community.

OUR VALUE TO CLIENTS

- Expert staff with **over 30 years of leading successful multi-million-dollar programs for various USG agencies** (DOD, NRO, NGA, DIA) in systems engineering, data science/analytics, technology insertion, surveillance and ground enterprise solutions.
- A trusted and reliable SDVOSB with a **strong track record for excellent CPAR ratings.**
- Through our specialized mapping tool, our E2E approach **enables leadership to reduce funding waste and make confident decisions** to inform stakeholders at all levels with the goals of enhancing mission capabilities, identifying process improvements, and maximizing return on capital investment strategies.

JOINT VENTURES

Y&W is managing partner / owner of two strategic Joint Ventures (JV):

- **YorkBright**, LLC, brings the physical and digital worlds together through award-winning **Virtual Reality (VR) and Augmented Reality (AR)** Technologies and services, supporting warfighter training, tactical operations, and other workforce engagement and development initiatives.
- **York-Brawley,** LLC, a Class A, licensed General Contractor (GC), offers a broad scope of general and specialty Construction Management (CM) services, including: Information and Communications Technology (ICT), design / build, renovation, asbestos abatement, demolition, HVAC services, and strong construction Project Management (PM).

TEAMING

Y&W strategically teams with other companies in order to offer the government expanded capabilities, innovative solutions, and in-depth expertise to our customers. Our firm has earned a reputation for reliability, integrity, and professionalism, as well as our ability to deliver results for our teaming partners and customers. Our teams produce highly technical, quick-turn inputs to our teaming partners that add value and drive success for the customer. Equipped with in-depth knowledge of our customers' goals and challenges, and a successful track record of past performances and outstanding CPARs, Y&W can add immediate value to any team or contract opportunity and help teaming partners win new or recompete business.

CAPABILITIES

Pink Summit is *Certified Agile Development Product Owner* and *Certified Agile Development Scrum Master.* They hold a *Top-Secret Facility Clearance* status to support software and design solutions with expertise in the following:

- Data Visualization, Transformation, & Analysis
- BigData Analytics, Search, & Data Mining
- Data, Software, and System Integration
- Mobile Application Development
- Domain experts for DoD, IC, Public Safety
- Data Search & Discovery
- Security & Identity Mgmt
- Project Management
- Agile Development
- Open Source

TECHNOLOGY PLATFORMS

- Web - Angular / React / HTML5 / Node.js
- Programming Languages – Java, Python, Kotlin, Typescript, Javascript
- Mobile Development – Android / iOS
- Cloud – AWS, Azure, private cloud, Containers, terraform
- DevOps – Maven, Gradle, Jenkins, Nexus, Git, Docker, SonarQube, AWS Pipeline
- Security – Keycloak, LDAP/AD, Splunk, Elasticsearch (ELK), PKI, OpenID Connect
- Analytics – Jupyter Notebook, Kibana, R, Python
- Platforms - SpringBoot, JBoss, Tomcat

HIGH PROFILE CLIENTS

Pink Summit serves as a government contractor and has completed projects for high profile clients, including the following:

SELECT PROJECTS

Project Title: AlwaysOnScene Fire and EMS Records Management
Agencies Served: FDNY, City of Chicago, Tualatin Valley Fire & Rescue, Prince George's County, San Ramon Valley Fire Protection District, City of San Mateo Consolidated Fire Department

- Contracted with FirstOnScene, LLC
- Project Highlights:
  - Upgrading the FirstOnScene RMS systems to the AlwaysOnScene software baseline
  - Modules include: Fire, EMS, Controlled Substance, Fire Prevention, Hazardous Materials, Fire Investigation, CAD Adapter
  - NFIRS 5.0 complaint
  - NEMSIS 3.0 Certification
  - On premise and cloud deployments
  - Software is customizable per agency allowing each agency to maximize the effectiveness for their unique use cases

Project Title: DI2E Development Tools (www.di2e.net)
Awarded Contract (approximate value): $1,100,000

- Contracted with Volant Associates, LLC
- Project Highlights:
  - Maintaining secure AWS Cloud based software developer focused applications and tools for 50,000+ users/developers supporting 1,000+ DoD/IC software projects (DI2E DevTools - www.di2e.net)
  - Created and managing the Identity and Access Management capabilities for DevTools, including Single Sign on across 15+ different tools and Multi Factor Authentication
  - Support custom enterprise chat software deployment that provides hosted slack like alternative chat option, where the client owns all their chat data/history
  - Scaling software across multiple VMs / containers for improved stability and performance
  - Provide leadership of the Security team responsible for Identity & Access Management, Software Security
  - Leadership of the Application Dev Team, responsible for custom project access management application, custom COTS & FOSS security integration, and custom Jenkins plugins

Project Title: DIB 5.0 Development
Awarded Contract (approximate value): $95,000,000

- Contracted with Connexta, LLC
- Project Highlights
  - Support the Agile development of the DIB 5.0 software baseline that is focused on secure enterprise data sharing across the DoD / IC

Project Title: Identity Management Project Manager for First Responder Network Authority (FirstNet)
Awarded Contract: $600,000

- Contracted with IMRI
- Project Highlights:
  - Developed Identity Management and security strategy for FirstNet
  - Developed mobile application security strategy, including mobile Single Sign-On (SSO) and Identity Management
  - Developed strategy for a mobile application developer ecosystem which included mobile application certification to help ensure all FirstNet applications were free from malware, viruses, and unintended behaviors

Project Title: Content Discovery and Retrieval (CDR) Services for Defense Intelligence Information Enterprise (DI2E)
Awarded Contract: $400,000 - Contracted with Multi Agency Collaboration Environment (MACE)

ENDEAVOR CONSULTING GROUP, LLC

CAPABILITIES STATEMENT

CAGE: 8EZT5 **UEI:** JPSJFYHBXLB1

ABOUT ENDEAVOR

Established in 2006 in the Philadelphia area. We offer consulting services in Supply Chain, Information Technology, Quality and Technical Operations. Core industries include Pharma, BioPharma, Consumer, Dietary Supplements and Food. We drive to find simple solutions to complex issues. We specialize in project management, technology integration, and consulting services, providing a wide range of solutions that best fits our client's needs.

CORE COMPETENCIES

- Project Management
- System Design, Development, and Integration
- SAP Consulting
- Supply Chain Services
- Warehouse & Logistics Services
- Quality Management Systems
- Quality Assurance Services for commercial and clinical products
- Analytical Quality Control
- Technology Transfer
- Product and Process Development
- Engineering & Scientific staff
- Business Consulting Services

DIFFERENTIATORS

- We are "**Supply Chain in a BOX"**
- Endeavor provides a range of project management, from a single business process to a complete End to End supply chain solution
- We can offer a single SME in a focused business area and/or technology or we can assemble a full cross-functional team to address that complex business challenge
- Our experience ranges from technologies like small and large molecule, for Pharma/Biopharma to Quality Systems like Veeva, to IT solutions like SAP S4/Hana and lastly, providing process engineering and development providing various technical transfer services
- Equipped with state-of-the-art staff augmentation service capabilities enable us to scale rapidly with many functional professionals to meet client's needs

TECHNOLOGY PLATFORMS

- SAP Hana S/4 – ERP system
- SAP Cloud – ERP Cloud
- Fiori - Mobility Apps
- Tulip, PAS-X (Werum) - MFG Exec. Syst.
- AWS, Right Networks - Cloud
- MAKE, Zapier, OmniConnect - API
- HighGear – Business Process Automation
- Veeva, MasterControl - Quality Mgt. Syst.
- MS 365 suite
- Java, XML, React - Web Development

AWARDS

2021 SAP Pinnacle Award in the New Partner of the Year (Midmarket) Category

NAICS CODES

- 541611 – Administrative Management and General Management Consulting Services (**Primary**)
- 541614 - Process, Physical Distribution, and Logistics Consulting Services
- 541715 - Research and Development in the Physical Engineering, and Life Sciences
- 541511 - Custom Computer Programming Services
- 541690 - Other Scientific and Technical Consulting Services

PAST PERFORMANCE

Project Title: DSE Healthcare Solutions - Skincare Portfolio Development

Endeavor assisted DSE Healthcare Solutions by providing support and insight in the development of line extensions of their current product portfolio. Specifically, Udderly **Smooth** New Product Development, **Acnomel** Acne Kit Launch and Consulting Assistance on client's clinical Study. Endeavor provided the following services:

- Reviewed client's portfolio and provided recommendations on how to renovate existing formula
- Developed recommendations and insight on DSE skin care line extensions
- Performed scientific due diligence on new products
- Collaborated with DSE and manufacturing suppliers and conducted knowledge transfer to DSE manufacturing

Project Title: Supply Chain Project Management Services for merger and acquisition

Endeavor executed Project Management services to manage performance and deliver acquisition unification strategy for our Consumer Fortune 500 client. Our services improved product and manufacturing site operations – resulting in improved gross profit. Endeavor also led strategy execution and activities with large cross-functional team of 25+ professionals. Overall, we provided the following services:

- Developed business and supply chain technical services, strategic plans, and key initiatives
- Refined technical services strategies, processes, and product/site transfer scenarios
- Created management and communication tools to ensure action plans were achieved
- Provided technical SMEs to support supply chain/risk management -- as well as analytics to access costs/risks of suppliers

Project Title: Wearable Device Assessment

Endeavor assessed the fluid path design of the client's wearable device to help reduce the work to demonstrate sterility maintenance over shelf life at one of our pharmaceutical Fortune 500 clients.
Endeavor provided the following services:

- Reviewed fluid path/overall design and generated report of early findings and potential area of opportunities
- Developed new fluid path design concepts to reduce the need of sterilizing the entire medical device

Project Title: SAP S/4 HANA STE Implementation

Endeavor worked with a Biopharmaceutical company to complete the execution of an SAP S/4 HANA Private Cloud Edition (PCE) implementation. Endeavor used an agile approach to complete the project, leveraging published SAP methodologies and tools such as SAP Activate Framework. This enabled a 'fit to standard' approach and ensured business processes were aligned with the resulting software scenarios. This implementation was used for a single manufacturing site, enabling GxP compliant materials management & inbound inventory processes to be completed prior to manufacturing activities.

Project Title: Chemical and Manufacturing Control (CMC) Vendors Assessment

Endeavor Consulting Group performed a Chemical and Manufacturing Control Readiness Assessment of two (2) vendors offering a drug delivery system technology platform. One vendor offers one (1) drug delivery technology while the second vendor offers two (2) drug delivery technologies. This assessment included vendor CMC reports capturing the area of opportunities based on their level of CMC maturity and supply chain readiness.

OUR COMPANY

Two pivotal events occurred in 1989. First, Tim Berners-Lee created the World Wide Web, triggering a digital revolution in information sharing that has now reached into every corner of the world and even into space. That same year, we formed Edge Digital Group, dedicated to helping government and industry capture and share data, and training their employees in a new and more efficient way.

It may have been a coincidence that both the Web and Edge were born in the same year, but the ever-growing demand and expectation to share nearly any digital asset has been the single most important reason behind our success. Because what we do is help our clients transition their non-digital assets to digital formats that make them more easily shared. And as the Web has grown exponentially, so have our skills and tools to handle digitized data intelligently, adding value at every step.

- Learn how we **capture** data from a variety of non-digital sources.
- Learn how we enable our clients to manage and **share** what they've captured.

About Us

Data is the lifeblood of any organization as it forms the basis for every decision and action. For over 25-years, Edge Digital Group has provided services to help transform and modernize customers business with the latest scanner technology, information management software and support services. Our products help you capture and optimize data to better serve customers as you advance and transform your business with insightful technology.

Alliances

Work with the best. It's good advice that we've taken seriously.

That's why we've partnered with Kodak Alaris, the hands-down, world leader in scanning technology, to be a solution provider and offer best-of-breed solutions. We can empower anyone to produce professional-level scans and integrate them seamlessly into SharePoint and other common document and records management solutions.

That way, you'll be assured of working with the best, too.

Kodak alaris · Microsoft · Gimmal · AvePoint® · NINTEX · ActiveNavigation · collabware · FEITH · Vaporstream

Contract Vehicles

We know the extra burdens imposed by law and regulation on federal agencies. Whether it's making work products 508-compliant or making timely responses to FOIA requests, agencies are under pressure to perform as never before. Another burden you don't need is a long and difficult procurement process. That's why we've become a GSA Schedule holder.

We hold GSA Schedule 36 contract 47QSMA18D08NW for *Office Imaging and Document Solutions*. This means our rates have been pre-approved and our operations fully vetted. Under this vehicle you can choose to award a sole source contract or conduct a limited competition to access our services.

GSA

PRODUCTS

We always look for the best value in everything we do and want to extend that value to our clients. That's why we have formed strategic partnerships with key information management companies. This allows us to supply you with the same hardware and software we use on a daily basis, at the lowest price. Talk to one of our seasoned professionals for dependable advice and a custom quote.

Scanners

We depend on Kodak Alaris Scanners because they have a robust paper path that is designed to transport paper quickly and gently. Each scanner uses the same powerful transport features throughout the scanner lines. Each scanner has sensors that detect multi-feed and stops the scanner before damage occurs. They have ultrasonic sensors that stop the scanning process there by eliminating missed pages.

Kodak Alaris scanners are not only the most reliable scanners on the market, but the least expensive to operate. The items that touch the paper are designed to scan tens of thousands of pages before needing replacement. In terms of the life of each scanner it will save thousands of dollars.

For the complete line of scanners that Kodak Alaris offers, contact us for help choosing the right scanners for your needs.

Software

Kodak Capture Pro is not only the software we recommend to our clients, but the software we use to run our business.

We use it for our day to day operations because it is always reliable and offers us the best value for our business operations and our clients.
Each project is different. We need to produce different types of documents for different projects. With Kodak Capture Pro we have the ability to generate multiple file types such as PDF's, Tiffs, etc simultanously to different locations. Some competitive products charge a "Click Charge" for each page you scan. Kodak Capture Pro has no such charges.

There are many different scanners on the market today. You may have several of them in your office. KCPS will support them. It is an open system that uses standard TWAIN and ISIS drivers. You can use the power of this software on virtually any scanner. Contact us to get the right version of Kodak Capure Pro for your scanner.

SERVICES

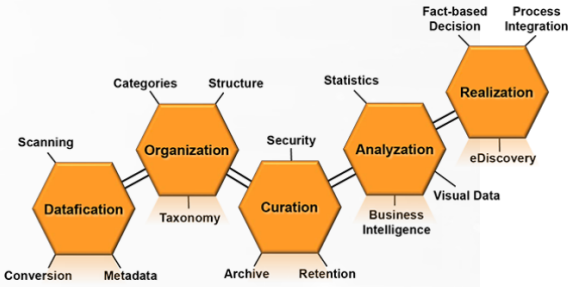
At Edge Digital Group we have always believed that ***simplicity is smart***. In fact, helping organizations get smarter by making work simpler and easier is in our DNA. For over 25 years we have helped government and commercial organizations meet the challenges of taking information management across the digital divide. We do this with simple yet powerful solutions that helps customers manage the complexity of switching to enterprise data management without making work more complicated.

Enterprise Information Management

Most government organizations already have the tool to manage their information – SharePoint. Yet many look elsewhere for more complex solutions built from scratch thinking these will do a better job. More often than not, such projects pose higher risks for cost and schedule overruns and failing to realize their intended benefits. Even worse, people can't use them.

We call our enterprise information management solution Records as a Service (RaaS). Our RaaS solutions consist of two parts – capturing and sharing information. These solutions help customers

- Securely digitize numerous types of media into searchable formats
- Enhance document formats for redaction, indexing and searching, identification and labeling, and compliance
- Automate document workflow
- Store and manage documents in a secure, compliant cloud
- Set up and efficiently run records management processes



Digital Conversion

Edge Digital Group is the premier digital strategist, building custom solutions that enable government and industry to transition their information assets into digital form. Converting an information asset into a *digital* asset creates value. Whether capturing data from old microfilm, Beta tapes, floppy disks and CDs, or even paper, once the information is in digital form, it can be indexed and searched. It can be viewed over any distance by as many people who have access. It can be easily duplicated and kept secure. And most importantly, it can be analyzed; correlations discovered, trends made to appear, connections brought into view. All of that creates value.

Over the past 25 years, we have worked with virtually every enterprise and small-scale content and digital asset system imaginable. Edge has converted hundreds of different formats, both physical and digital. Whether it's old archives or active paper, you need a reliable, long-term conversion solution. Buying the hardware and software is easy (you can get it all right here), but putting it all together for maximum efficiency and minimal maintenance can be tough.

Founded in 2004, Cask, LLC is a woman-owned small business focused on business and technical strategies and solutions. Cask has expertise across multiple functional domains including strategy, acquisition, business analysis, engineering, IT, and technology services. Cask provides expert support, taking an agile approach to helping clients with information and process driven strategies, services, and solutions that ensure successful outcomes. Our diversified customer base includes the Department of Defense (DoD) and Federal Government. Cask has a distinct team of experienced practitioners who are analysts, engineers, technologists, and consultants highly skilled in a multitude of services including:

- Cybersecurity
- Acquisition Strategy and Planning
- Portfolio and Program/Project Management
- Business Analysis
- SharePoint Development
- Business Intelligence
- Requirements Management
- Procurement Management
- Supply Chain Management
- Systems Integration
- Systems Engineering
- Enterprise Architecture
- ITSM & ITIL
- IT Governance
- Benchmarking
- Independent Verification and Validation (IV&V)

We understand every organization and department is unique. We work closely with our clients and partners to ensure the best outcome for their individualized requirements. Cask is unique in that we provide results that are practical, measurable, and sustainable. We are dedicated to the success of our customers through the professional, focused, and timely delivery of services and solutions. We invest the time to understand your requirements, and then rely on our experience, processes, innovation, knowledge, and commitment to satisfy your needs. Cask implements our services and solutions with an emphasis on building competitive advantage and stronger value propositions for our clients by implementing "leading practices" and "next practices." We recognize that by employing both proven processes as well as innovative methods our customers receive quality results in the most decisive manner. 2021 was a strong year for Cask. We were awarded the "Number 1 Small Business to work for by Consulting Magazine for 2021 and part of the top 10 for 2022" and approved as an Authorized CMMC Third-Party Assessor Organization (C3PAO) Provider to ensure the Defense Industrial Base is secure.

IAMUS
CONSULTING

Experts in Cybersecurity Operations & Solutions

WE ENABLE MISSION SUCCESS

Why Choose Us?

We deliver mission-focused, practicable, and actionable solutions for complex cybersecurity problems.

We leverage cyber tool investments to enable meaningful data analysis across disparate data sources. .

We currently support customers at USCYBERCOMMAND, USARMYCYBER, USAIRFORCECYBER, USMARFORCYBER and USCB (2020 Decennial Census).

Capabilities

Defensive Cyber Operations

- Blue Team
- Purple Team
- Security Monitoring
- Incident Response
- Attack, Sensing, & Warning (AS&W) Analysis
- Cyber Threat Intelligence Analysis
- Threat Hunting

Offensive Cyber Operations

- Red Team
- Penetration Testing

Cyber Solutions & Services

- Data Engineering, Profiling, Standardization, & Management
- Data Science & Machine Learning
- Information Systems Security Engineering
- Software Development
- Systems Architecture, Engineering, Integration & Deployment
- DevSecOps Engineering
- Governance and Policy Expertise
- DoD Acquisition & Evaluation
- Commercial/Cloud-based Solutions
- Integration & Deployment
- Software Assurance

CORE CAPABILITIES

Reliability Availability Maintainability (RAM)

- Failure Reporting and Corrective Action System (FRACAS)
- FMEA/FMECA Development and Validation
- Reliability-Centered Maintenance Analysis
- Reliability Growth/Block Diagrams
- Reliability Improvement Programs (RIP)
- Reliability Growth/Block Diagrams

System Software

- Coding and Testing
- Configuration Management
- Independent Verification and Validation
- Software/Hardware Integration
- Web Development and Tutorials

Logistics

- Integrated Electronic Technical Manuals (IETMs)
- Live Fire Test Support
- Material Fielding
- Maintenance Planning and Execution
- Material Readiness

Supply

- Inventory Control
- Packaging, Crating, and Shipping
- Property Book Operations
- Receipt, Storage, and Issue
- Supply Procedures

Training and End-User Support

- Formal Classroom Instruction
- Helpdesk Support
- New Equipment Training
- Technical & Training Documentation
- Web Development and Tutorials

PROGRAMS & SYSTEMS

Aviation Programs

- AH-64 Apache
- CH-47 Chinook
- UH-60 Black Hawk
- Future Vertical Lift (FVL)
- Improved Turbine Engine Program (ITEP)

Weapon Systems

- Digital Fire Control Weapon System: M777A2, M119A3
- Mortar Fire Control Systems: M95, M96, M150, M151
- Portable Fire Control System: Excalibur
- Advanced Mortar Protection System: XM905
- Artillery Fire Control Weapon System: Paladin

Missile Programs

- AGM-114 HELLFIRE Missile System
- Counter-Rocket Artillery and Mortar (C-RAM)

INVEX
TECHNOLOGY SOLUTIONS

Capability Statement

Invex is a certified Veteran Owned Small Business that started in 2015 and provides architecture and engineering consulting services in the areas of cloud, cybersecurity, and big data supporting customers to design, develop, and maintain secure cloud solutions. We have partnerships with several key product companies and have tailored industry best practices to build solutions that meet mission goals and objectives while complying with rigorous security constraints. We primarily support US Federal government customers.

Systems Architecture & Engineering
- Agile Methodologies (SAFe, Scrum, Kanban)
- Cloud architecture and engineering
- Security architecture and engineering
- Software architecture and engineering
- Requirements Engineering (high and low level)

Technical Proficiencies
- Cloud design and migrations
- Software design and development
- UML design, SQL and No-SQL data design and implementation
- AI/ML research and development
- Java, Python, Javascript development
- ETL, image/video, and text processing
- Vendor relationships and technology roadmaps
- Product integration and development

Cloud Engineering:
- AWS certified cloud professionals
- SecDevOps engineering and implementation
- Data management, ETL, Storage, and security
- Legacy migrations from on premise to the Cloud
- Hybrid cloud implementations
- Security design and implementation
- Cloud operations, reliability, and performance
- Cost management and optimization

Security Engineering
- System accreditation in highly secure environments
- Compliance with various government standards
- Access Control / Identity Management
- Defense in Depth design and implementations
- Security assessments and recommendations

Cutting-Edge Technology...

A large and diverse pool of proven industry leaders. Streamlined acquisition and fast provisioning. These are among the advantages of choosing CIO-SP3, a Government-Wide Acquisition Contract (GWAC) from NITAAC that can be used by any federal civilian or DoD agency to fulfill a broad range of mission critical IT requirements.

About CIO-SP3:

With a $20 billion ceiling, flexible contract types and the ability to award in modular increments and incorporate performance-based features, CIO-SP3 Small Business allows for streamlined planning, acquisition and deployment of large-scale IT program requirements while leveling the playing field with more meaningful small business competition. DV United, as a CIO-SP3 Prime Contract holder, has developed innovative and secure solutions for agencies across the federal government and initiatives as diverse as Cloud Computing, Cyber Defense and Health IT.

CIO-SP3 Contract Information:

Contract Number(s):	HHSN316201200193W (Small Business) HHSN316201200060W (SDVOSB)
Contracting Officer:	NITAACsupport@nih.gov
Phone:	1.888.773.6542
Contract Ceiling:	$20 Billion
Task Order Types:	Firm Fixed-Price, Cost Plus Fixed Fee, Cost Plus Award Fee, Cost Plus Award Term, Cost Plus Incentive Fee, IDIQ, Time and Materials
Ordering Web Site:	http://nitaac.nih.gov/nitaac/e-ordering-systems

About DV United:

DV United is a Service-Disabled Veteran-Owned Small Business (SDVOSB) that combines the strength of 34 successful and established IT small businesses to provide a single-source resource to support Federal Government customers in response to the Chief Information Officer – Solution and Partners 3 (CIO-SP3) (GWAC). Our mission at DV United is to meld project execution disciplines with the individual strengths of our partner companies while provisioning clients with highly qualified people, best practice processes and collaborative tools to cover the depth of skills necessary to support each task order assignment.

DV United Information:
→ CAGE Code: 4EN51
→ DUNS #: 557258436
→ EIN: 65-1252945

Chief Information Officer – Solution and Partners 3 (CIO-SP3)

CIO-SP3 Task Areas

DV United provides support in all ten (10) of the task areas that constitute the technical scope of this contract. These should be used as a guide, and do not preclude placing any IT task order for services/solutions on CIO-SP3. This GWAC is intended to cover any IT solution, and is designed for maximum flexibility. If a customer is unsure of which task area(s) their requirement falls under, NITAAC will provide assistance in making the determination.

- Task Area 1: IT Services for Biomedical Research, Health Sciences, and Healthcare
- Task Area 2: CIO Support
- Task Area 3: Imaging
- Task Area 4: Outsourcing
- Task Area 5: IT Operations and Maintenance
- Task Area 6: Integration Services
- Task Area 7: Critical Infrastructure Protection and Information Assurance
- Task Area 8: Digital Government
- Task Area 9: Enterprise Resource Planning
- Task Area 10: Software Development

Contract Details

- 10-Year, multiple award indefinite-delivery, indefinite quantity (IDIQ) GWAC
- $20 billion contract ceiling
- For everything ITSM in support of the Federal Enterprise Architecture, the Department of Defense Enterprise Architecture and the Federal Health Architecture.
- .55% contract access fee capped at $150K on any task order base or optional period (not to exceed 12 months) with funding in excess of $20M
- No additional charge for value-added services and support

Best in Class

All Three of NITAAC's Government-Wide Acquisition Contracts are "Best in Class."

NITAAC Program Benefits

- Easy-to-use, secure web-based e-GOS ordering system for automated task order competition, set-aside, management, awardee selection and notification
- No special "Delegation of Procurement Authority" is required by NITAAC
- Customer Support Center provides 1-hour response to any contractual, technical or procedural question
- 1-day turnaround on free, comprehensive SOW/PWS assessment for every task order assures quality responses
- Free training on GWACs, FAR 16, NITAAC contracts and NITAAC online ordering systems; certification for 2 CLPs awarded
